

# RAINWATER HOG<sub>2</sub>

## The Award-winning rainwater storage

- Modular design with extendable capacity
- Built for reuse with 20 year design life
- Designed to withstand temperature extremes
- FDA-approved potable non-offgassing plastic
- Simple installation and operation
- Contributes up to 9 LEED points

**Combine with lattice or screen for a water-storing, self-irrigating green fence!**

### **This LEED Platinum home in Los Angeles, CA with 2 HOGs**

- captures enough rain to irrigate a vegetable garden through summer
- holds backup emergency water for a family of 4
- commands enough water pressure for pump-free gravity drip

#### **HOG FACTS**

- 2 HOGs full of rainwater can
  - irrigate a 140sq ft NYC garden year round
  - provide 25 days emergency water for 4 people

### **6 HOGs in Oakland, CA flush the family toilet**

- ultra-low flush toilets with city water topup will flush with rainwater up to 90% of the year
- anticipated savings of over 6,000 gallons per year
- contributing 9 points to LEED Platinum rating for remodel

#### **HOG FACTS**

- 6 HOGs could rain-flush a Chicago 2 person household all year
- 6 HOGs could run a front load washer all year for a Boston 4-person household
- the PH of rainwater is gentle on clothes

### **114 HOGs at Nundah School, in Australia, hold 5,700 gallons of rainwater**

- flushing toilets in the building year-round
- irrigating the surrounding landscape
- educating students in water pressure and responsible water use

#### **HOG FACTS**

- All Hog colors are UV-stabilized
- HOG's used inside a building can offset peak energy loads
